**DRYLOK OIL WATERPROOFER FORMULATION**

**MATCHING: DRYLOK OIL WATERPROOFER COLORS**

**SYSTEM: GLIDDEN PROFESSIONAL USING 64 INCREMENTS  
PER FLUID OUNCE**

**EXPLANATION OF NOTATION:** The amount of colorant to be added is listed in two columns under the container size. The first column under OZ. lists the number(s) of full fluid ounces of colorant to add. If a zero appears in this column, no full fluid ounces are added, only fractions of a fluid ounce. The second column under the heading 64, lists the number(s) of fractions, 64ths, of a fluid ounce to add. If a zero appears in this column, no fractions are added, only full fluid ounces. If you have any questions on these formulas please contact **UGL** at 1-800-845-5227 before starting to tint.

**IMPORTANT:** Due to the differences between the pigment used in the ready-mixed colors and those used in tinting systems, minor variations are possible. For this reason, store-tinted colors should **NOT** be used to complete a job started with ready-mixed colors or vice versa.

UGL can only control colors of their own manufacture. Therefore, we **CANNOT** guarantee that the formulas as indicated will be exact matches. Colors as listed represent our matches to color chips. It is advisable to **PRE-DETERMINE** the formulas, as being used, will provide the proper color match. UGL cannot assume any responsibility for any changes in shade that may occur.

**COLORANTS**

BLK - Black  
FFR – Fast Fast Red  
LFY – Lemon Yellow  
MAG - Magenta  
OXR- Oxide Red  
TBL – Thalo Blue  
GRN – Thalo Green  
WHT - White  
YOX – Yellow Oxide
