PELICAN HILL GOLF CLUB

NEWPORT, CALIFORNIA

At this prestigious golf club in Newport, two cart path tunnels constructed of masonry needed protection from water seepage. Maintaining the club's distinguished appearance was paramount.

DRYLOK® MASONRY WATERPROOFER

The maintenance personnel purchased 200 gallons of white DRYLOK® Latex Base Masonry Waterproofing and applied it to the tunnels with great success. Now, thanks to DRYLOK®, the tunnels and the golfers will remain dry.
